

# Murano Integrale – glass roof with awning

Optimal protection with integral sunshade

# Overhang type (Ü)

#### with recessed posts

Here the posts can stand e.g. on the patio with the roof overhang taken out over them. Rainwater is drained via a water spout (standard) or optionally via a stainless steel rain chain or downpipes.

### Customised protection from the elements

- Width max. 700 cm, depth max. 500 cm
- With 2 to 3 posts (depending on load and type)
- Optional roof pitch: 3° to 20° (stepless)

Murano Integrale offers variable shelter from the rain, the temperature and the sunlight. With an awning integrated into the wall profile, this model combines the transparency and protection of a glass roof with the advantages of a high-quality awning for adjustable shade from the sun. Various types and styles with posts in line with the front profile and flush or positioned inwards laterally are available to choose from, even for this generously proportioned glass roof.

Flush type with laterally recessed posts (style B2).

#### Flush type (B)

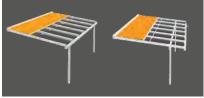

with front-facing posts

The posts are in line with the gutter for a compact, modern look.
Rainwater is drained via the rafters, gutter and down the inside of the post.

## Murano Integrale

Equipment and technical features

made in germany  EN 1090 EN 13561  Manufactured and assembled in Germany TÜV-tested safety Quality and technology CE-compliant	•	'
